DARK GREEN

LIQUID IRON "For the Darkest Green EVER!"

"COMMERCIAL USE ONLY"

FL 1142

Chelated Iron (Fe) 5.00%
Chelated Manganese (Mn) 0.80%

Derived from Ferrous Glucoheptonate and Manganese Glucoheptonate

SHAKE BEFORE USING.

Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. If irritation persists, obtain medical attention.

HOUSEPLANTS: Mix 1 tablespoon DARK GREEN per 1 quart of water. Always shake before using. Apply a fine mist to tops and bottoms of leaves. Moisten only to the point of run-off. *Repeat when greening is desired.
GARDENS: Apply using household directions -or- Mix 2 oz per 1 gallon of water in a pump up sprayer. Evenly apply fine spray to tops and bottoms of foliage, to the point of run-off.
RESIDENTIAL LAWN APPLICATION, GREENS AND TEES: Apply 10 oz DARKGREEN with sufficient water to cover, per 1000 SQ.FT. *Repeat as necessary.*
FAIRWAYS AND COMMERCIAL TURF: Apply a 2-3% solution DARKGREEN with tank sprayer or through sprinkler system. (Is 2-3 gallon / 100 gallons water). *Repeat as needed*
AGRICULTURE: Apply from 1-2 quarts for row crops to 3-4 quarts for fruit trees per acre. Foliar spray application is best method to apply.

To help aid absorption, it is recommended to apply Dark Green with Some nitrogen. ie Urea, Ammonium nitrate, Potassium nitrate.

******Highly concentrated DO NOT over apply. *** To ensure compatibility with foreign spray mixes, a jar compatibility test is recommended before mixing with other products other than water in the tank. Always fill tank with water first, then begin applying CROPMASTER products while tank is circulating. "NEVER MIX CONCENTRATES DIRECTLY TOGETHER"**

CONDITIONS OF SALE: BUYER ASSUMES ALL RESPONSIBILITY FOR USE, STORAGE, HANDLING AND DISPOSAL OF THIS PRODUCT WHEN NOT IN ACCORDANCE WITH LABEL DIRECTIONS. U.A.S. INC. AND ITS DISTRIBUTOR'S LIMIT OF WARRANTY EXTENDS ONLY TO REPLACEMENT

Disclaimer
It is recommended not to use this product with fungicides or pesticides. However, if applied with a conduct a trail application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test is recommended.
Always read label instructions.

Dispose of Waste Material according to local, state, and Federal environmental laws and regulations.

Storage: Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temper

DARK GREEN is designed to prevent and correct pre-existing Iron deficiencies as indicated by plant leaf and soil testing. The ingredients in DARK GREEN are 100% water soluble and chelated. This product extremely efficient for the plant to pick up in situations where a rapid response is desired. Results are often evident one to two days after application. Research has shown the plants can assimilate Micro nutrients better via foliar application than if the Micro nutrients were applied to the soil. Even if you have micro Nutrients added in your granular NPK mix, you will not be getting the maximum benefits from them and essentially wasting money.
WHY SHOULD SOILS BE DEFICIENT IN IRON? IRON alone cannot be absorbed as a simple free flowing ion. IRON is more readily absorbed in the liquid chelated form.

It would be recommended when applying in the soil to add our Super Hume concentrate to help buffer irregular soil pH, so the IRON work faster and be last longer.
BENEFITS OF DARKGREEN *Makes Turf Greener* *Stays green longer* *Will Not wear down equipment like straight Iron Sulfates do* *Easy to mix* *Economical*
