

SSP

SUPERB SOIL CONDITIONER / ADDITIVE

"COMMERCIAL USE ONLY"

Ammonium Laureth Sulfate. 60%
Other Ingredients 40%

FL 1142

Harmful if swallowed. Avoid contact with eyes, skin, and clothing. If on skin, wash with large amounts of soap and water. If in eyes, rinse repeatedly with clean water. If irritation persists, obtain medical attention.

SOIL: Apply 12 ounces per acre, or 1 gallon per 10 acres with sufficient water to cover Broadcast directly onto soil. Extreme hardpan may require repeat applications. Using stronger mix ratio has shown no less or no more effectiveness.

Can be used as a preventative in a regular Program at the rate Can be mixed with most other soil amendment Products.

*****Highly concentrated DO NOT over apply. *** To ensure compatibility with foreign spray mixes, a jar compatibility test is recommended before mixing with other products other than water in the tank. Always fill tank with water first, then begin applying CROPMASTER products while tank is circulating. "NEVER MIX CONCENTRATES DIRECTLY TOGETHER"*

CONDITIONS OF SALE: BUYER ASSUMES ALL RESPONSIBILITY FOR USE, STORAGE, HANDLING AND DISPOSAL OF THIS PRODUCT WHEN NOT IN ACCORDANCE WITH LABEL DIRECTIONS. U.A.S. INC. AND ITS DISTRIBUTOR'S LIMIT OF WARRANTY EXTENDS ONLY TO REPLACEMENT

It is recommended not to use this product with fungicides or pesticides. However, if applied with a fungicide or pesticide, it is the users responsibility to conduct a trail application on the crop(s) to be sprayed with this mix of chemicals to determine compatibility of products and compatibility with crop(s) sprayed. When mixing with other spray materials a jar compatibility test is recommended.

Always read label instructions.

LOT NUMBER 7502

Disclaimer

Dispose of Waste Material according to local, state, and Federal environmental laws and regulations. Storage: Keep container sealed tightly when not in use. Do not expose to sunlight for long periods of time. Store in temperatures between 5 C (41 F) and 25 C (77 F).

SSP is engineered to loosen compacted soil and break up hardpan, which causes expensive problems. It is a full 60% solution of Ammonium Laureth Sulphate, the strongest we know of on the market. While some products advertised to do the same job, are actually wetting agents that just help drain excess water, by breaking down water size. This allows the water to seep into cracks in the soil. This is only a temporary fix to be used after every rainfall. Using SSP will increase the downward movement of water which makes it more available to the plant. SSPtually works on the soil itself to improve flocculation and tilth, thus insuring moisture movement down and back up to make sure root systems are adequately fed. Experience the results of SSP , with easier tillage in the spring, summer and fall. Saving time, fuel, and equipment, while increasing yield. Very Effective for LDS (Localized Dry Spot) In Turf.
